SESD57 NUTRITION FOR AEROBIC PERFORMANCE · TASK 2 · 5 MIN

Predict fat and carbohydrate use

Name(s) _____

At each intensity, sketch **two bars** in the dotted guides, one for fat and one for carbohydrate (CHO). No scale is needed. Show how the bars compare in height. Then answer the three questions.

Key ☐ Fat ☐ Carbohydrate Choose your own shading

1. What happens to total energy use?

2. What happens to fat use above 65%?

3. Why might fat use fall at higher intensities?
